- (k) **Basis for Computing Moorage Charges.** The Docks and Harbors Department will assess moorage charges based on the silhouette length of the vessel or the designated stall length, whichever is greater. Silhouette length is defined as the linear distance, in feet, from the forward most part at the stem to the aftermost part of the stern of the vessel, measured parallel to the waterline of the vessel, including all appurtenances that are the property of the vessel owner. Stall length is defined as the length of the finger pier assigned to the vessel or, in the case of side-tie moorage, the vessel's silhouette length as calculated above. The Docks and Harbors Department reserves the right to measure a vessel and adjust moorage charges to the point in time when the owner first moored the vessel in the CBJ harbor system.
- (l) **Charges When a Vessel Shifts to a Different Berth.** When a vessel is shifted directly from one position to another berth or slip, the total time at such berths or slips will be considered together when computing moorage fees.
- (m) **Charges for Designated Loading Zones.** There are no moorage fees and charges for use of a designated loading zone when used in accordance with regulations and rules established for the loading zone.
- (n) **Other Fees and Charges.** This fee schedule does not restrict fees and charges that may be established through other Docks and Harbor Department ordinances and regulations.
- (o) **Relationship to Other Harbor Regulations and Rules.** This fee schedule applies in addition to other CBJ harbor regulations and rules. These regulations take precedence in cases where these regulations differ from other CBJ harbor regulations and rules adopted prior to the effective date of these regulations.

The owner of the vessel is responsible for immediately notifying the Harbormaster when their vessel is being occupied and used, rented, or leased as a place of residence.
